

The Genius Behind Happy Borrower Experiences

Automation-enabled workflow for middle-office origination optimization

The heightened focus on delivering a digital borrower experience is justified.

The digital mortgage experience has improved the customer experience tenfold, but for many lenders, front-end innovations are still not enough to keep the customer happy and engaged. Not when the true hang-ups occur in the middle-office where resource-intensive, manual processes adversely impact the frequency and speed of borrower communications.

That's where GeniusWorks makes the difference. GeniusWorks is a groundbreaking blend of innovative mortgage automation and human touch that serves as the connective tissue between the front and middle-office origination operations.

By pairing Indecomm's mortgage underwriting talent with workflow automation, GeniusWorks streamlines and accelerates tasks, processes, and analyses at the most cumbersome phases of origination: loan set-up, processing, and underwriting.

Scale up borrower experiences without scaling up costs or staff

- ✔ 30% cost reduction
- ✔ 50% reduction in the number of lender touches per loan
- ✔ 70% Middle-office tasks are automated
