

Gain a 360°View of Trailing Docs in One Powerful Platform

DocGenius (previously ViewPoint) delivers a seamless and interactive mortgage trailing document management solution that helps you effectively manage risks, processes, timelines, and performance.

DocGenius for On-demand, Interactive Management

Title and settlement agents work collaboratively with Indecomm's title services team through our interactive trailing doc management system, DocGenius.

With DocGenius, users gain:

- Instant visibility into a portfolio's performance
- Detailed reports on outstanding documents, liabilities, past performance, and peer comparisons
- Ability to track and monitor agent/lender performance
- Two-way communication and automated follow up: with agents and lenders

DocGenius calculates the expected return date (ERD) using an extensive repository of turnaround data. From start to finish, DocGenius keeps track of your most critical mortgage documents such as unsecured mortgages and title policies, using automation to streamline document management workflow while lowering costs.

Track and manage trailing docs in one centralized, interactive platform.

DocGenius Plus Service

Lenders and settlement agents using our interactive platform, DocGenius, benefit from seamless transactions, reduced repurchase risk, better relationships, and fewer foreclosure issues. Lenders and settlements operate optimally and with confidence when they combine DocGenius with unsurpassed expertise in title and settlement best practices, templates, guidelines, and checklists.

Indecomm's extensive knowledge combined with our proprietary platforms ensures you meet internal timelines and county-level requirements while minimizing process errors along the way.
