

Intelligent Document Indexing & Data Extraction

Streamline, expedite, and improve mortgage document indexing and document-to-data extraction with IDXGenius.

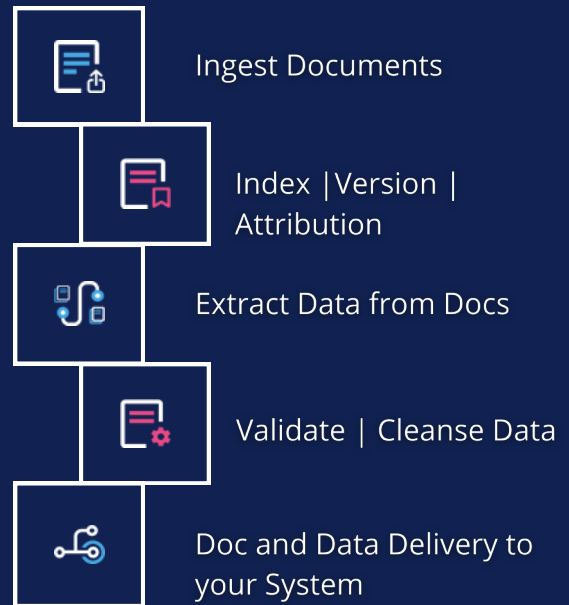

Streamline Mortgage Document Processes with IDXGenius

For decades, mortgage operations have been hindered by document processing challenges that drain time and money. Issues like misfiled documents, incorrect versioning, and manual data extraction prevent mortgage teams from achieving optimal efficiency. Indecomm's IDXGenius eliminates these challenges, presenting organizations with an opportunity to modernize and move beyond manual.

IDXGenius helps mortgage organizations achieve:

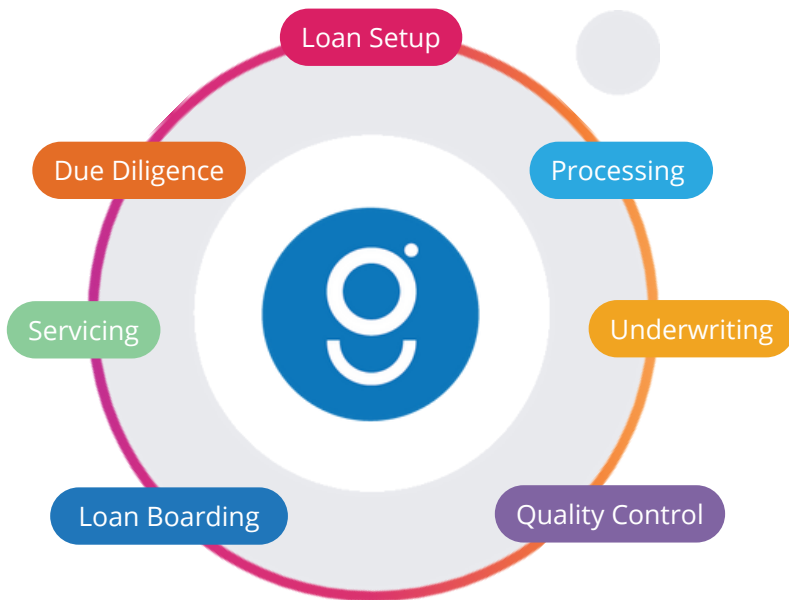

- **Automate at Scale:** Automates document indexing, naming, and versioning
- **Accurate Data Extraction:** Extracts essential data points from a wide range of mortgage documents— with high precision.
- **Faster Processing Times:** Cuts down processing times and improve decision-making speed
- **Zero-Touch Solution:** Complete turnkey solution eliminates manual document processing
- **Seamless Delivery:** Data and documents seamlessly delivered to your system.

IDXGenius is an award-winning solution that leverages a blends proprietary machine learning and business rules with generative AI and AWS Textract to transform mortgage operations, automating complex tasks such as document indexing, versioning, and data extraction with unrivaled speed and precision.
